THE CJIS NEWSLETTER

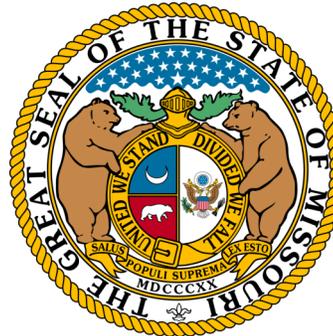

Criminal Justice Information Services

| 4 - 0 |

Newsletter Instructions; Policy Updates and Revisions

This newsletter should be divided into several sections. One section contains the pertinent information for MULES/NCIC Operators and should be removed and placed with the *MULES/NCIC Operational Manual* for future reference. Another section contains information for Uniform Crime Reporting agency

points of contact and should be removed and placed with the *Missouri Supplement to the UCR Handbook* and the appropriate FBI *UCR User Manual*. Please ensure that all affected personnel receive an opportunity to review *The CJIS Newsletter* before it is sectioned out and placed with the designated manuals.

Mailbox Available for CJIS Newsletter Articles or Inquiries

Any Missouri criminal justice agencies that wish to submit content to the CJIS Newsletter (no editorials or commercial materials please) for distribution to the Missouri CJIS community, please feel free to do so by emailing articles to CJISNews@mshp.dps.mo.gov. Content will be subject to approval.

Additionally, please feel free to submit any questions or comments regarding the content of the CJIS Newsletter to CJISNews@mshp.dps.mo.gov or 573-526-6278.

CJIS Newsletter Available Online

The CJIS Newsletters are always posted online on the same date they are released. The newsletters are available on the UCR website on the 'Downloads' page at:

<http://ucr.mshp.dps.mo.gov/ucr/ucrhome.nsf/downloads?openview&Count=50>

Alternatively, the newsletters are also published on the CJIS Launchpad under the CJIS Documents link for MULES users.

2013 MSHP CJIS Annual Report Now Available

The 2013 CJIS Annual Report contains an outline of all responsibilities held by the MSHP CJIS Division, as well as a recap of all annual statistics, accomplishments, pending projects, and contact information. The document can be accessed at:

<http://www.mshp.dps.missouri.gov/MSHPWeb/Publications/OtherPublications/documents/2013MSHPCJISAnnualReport.pdf>

CJIS Security Unit — Risk Assessment Questionnaire

In preparation for the next FBI audit of Missouri in 2015, and to ensure that agencies are audited based on the actual risk they pose to the Missouri CJIS systems, the CJIS Security Unit is conducting an information security risk assessment for all CJIS terminal agencies.

The CJIS Security Unit sent out agency risk assessment questionnaires in January 2014. The questionnaire is designed to help the CJIS Security Unit assess information security risk thereby giving us a better understanding of how each agency is structured. The risk scores will be used, in part, to determine the IT security audit schedule for the 2014-2017 audit cycle.

Of the 592 agency risk assessment questionnaires that were mailed out, 177 have been completed and returned to the CJIS Security Unit. The deadline for returning the risk assessment questionnaire is May 1, 2014. All agencies that fail to return the questionnaire by this deadline will be considered non-compliant and will be subject to an immediate audit.

If you have any questions regarding the Risk Assessment Questionnaire, please contact the CJIS Security Unit at 573-526-6153 ext 2779.

2014 CJIS Conference Announced!

Make plans now to attend the 2014 CJIS Conference on September 22 – 24, 2014 at the Lodge of Four Seasons in Lake Ozark, MO. Like last year, the conference will feature a variety of presentations on MULES/NCIC, UCR, system security, and more. This year's conference will also feature speakers from the FBI's CJIS Division and the National Insurance Crime Bureau. A tentative agenda is available on the CJIS Launch Pad.

You can now register to attend online by visiting www.regonline.com/mocjisconference. When you register you can choose which sessions you are most likely to attend and create a personalized conference schedule. Attendees can log back in to their account, check for updates, and change their chosen training sessions. Have a mobile device with scanning capability? Then just scan the QR code on the flyer in this newsletter and you'll be taken directly to the registration website.

Fees for the conference are \$175 per attendee. Lodging is \$83 per night and rooms should be booked directly with the Lodge of Four Seasons by visiting:

<https://bookings.ihotelier.com/bookings.jsp?groupID=1203290&hotelID=17336>

(You can access the hotel booking link from the registration site or by calling 888-265-5500)

If you need more information or have question, please contact your MULES Trainer or call Chris Parr at (573) 526-6153 ext. 2774. We hope to see you there!

CJIS CONFERENCE

2014

September 22, 23, & 24

At Lodge of the Four Seasons, located at
the beautiful Lake of the Ozarks

Featuring speakers from the Missouri Highway Patrol, FBI CJIS, and NICB presenting on a variety of topics to include:

- *Criminal History Creation, Access, & Interpretation*
 - *National Crime Information Center*
 - *National Insurance Crime Bureau*
 - *Warrant Processes*
 - *Network Connectivity Options*
 - *UCR Update*
 - *Security Audit Update*
 - *MULES 4 Validation Procedures*
 - *MULES/CJIS Audit Procedures*
- ...and much more!**

Plus:

Vendor Happy Hour, Nightly Hospitality Suite, snack and cocktail hours, Movie Nights, and other great activities.

THE LODGE
OF FOUR SEASONS

A TRAVELER'S PARADISE

Registration Fee: \$175 per person

Registration fee includes all training and organized social events, including a formal luncheon on Tuesday featuring a keynote speaker to be named later

To register visit:

<https://www.resonline.com/mociisconference>

Room Registration: \$83

Room reservations must be made directly with The Lodge of Four Seasons. Call (888) 265-5500, follow the link in the online registration form, or follow the link on the CJIS Launch Pad to book rooms online.

Questions? Call Chris Parr at (573) 526-6153 ext. 2774

NEW Livescan Devices

New MorphoTrak Enterprise Livescan Application (ELSA) devices have been rolled-out in 2014. There are several new features to look for with the new device compared to the current ILS2 livescan devices. The first noticeable change is that there is only one platen glass that captures rolls, slaps, thumbs, and palm prints — compared to the ILS2 which has either one or two platen glasses. In addition, the device is configured to auto-capture prints, effectively eliminating the need to click a button or step on a foot pedal to start the capture process. The ELSA will be available in portable, desktop, and cabinet models. Please review the new training video on the CJIS Launch Pad that demonstrates the redesigned software and new functionality. If your agency is interested in purchasing a new ELSA device, contact Charles Thomas at Charles.Thomas@morpho.com to request a quote.

STRANGE... BUT TRUE Missouri Statute of the Month!

9.105 - Bird Appreciation Day Observed.

The twenty-first of March shall be designated as "Bird Appreciation Day" to be observed by elementary and secondary schools, cities, state agencies and civic organizations with activities designed to enhance the knowledge and appreciation of Missouri birds.

REPORTING HUMAN TRAFFICKING IN MISSOURI

Section 566.223 RSMo. was revised as a result of HB 214 in 2011. The changes in law involve authorizations and requirements for law enforcement and specified government agencies statewide. You are receiving this notice to make you aware of the standards contained within the law and to provide you with an Internet link to a recently launched website interface for use by law enforcement to inform the Department of Social Services (DSS) when you are dealing with apparent concerns of human trafficking in Missouri.

Pursuant to 566.223 RSMo.:

- As soon as possible after a first encounter with a person who reasonably appears to a law enforcement agency to be a victim of trafficking as defined in Section 566.200, that agency or office shall notify DSS and, where applicable, juvenile justice authorities that the person may be a victim of trafficking, in order that such agencies may determine whether the person may be eligible for state or federal services, programs, or assistance.
- DSS may coordinate with relevant state, federal, and local agencies to evaluate appropriate services for victims of trafficking. State agencies may implement programs and enter into contracts with nonprofit agencies, domestic and sexual violence shelters, and other nongovernment organizations to provide services to confirmed victims of trafficking, insofar as funds are available for that purpose. Such services may include, but are not limited to, case management, emergency temporary housing, health care, mental health counseling, alcohol and drug addiction screening and treatment, language interpretation and translation services, English language instruction, job training, and placement assistance.

The link below will connect you to the online application intended for use by law enforcement agencies to DSS as soon as possible after a first encounter with a person who reasonably appears to be a victim of trafficking, in order for DSS to determine whether the person may be eligible for state or federal services, programs, or assistance. DSS may use the information provided in order to coordinate with relevant state, federal, and local agencies to evaluate appropriate services for victims of trafficking.

<https://dssapp.dss.mo.gov/ReportMOHumanTrafficking/>

The information provided on the reporting form will be used by DSS to determine whether the alleged victim may be eligible for state or federal services, programs, or assistance.

If this report involves a child who may be the victim of human trafficking, please contact the Child Abuse/Neglect Hotline at 1-800-392-3738 in addition to completing the reporting form.

Fast ID Fast Facts

WHAT IS *Fast ID*? *Fast ID* is an identification tool for law enforcement agencies only. It enables law enforcement officers to perform fingerprint searches from a roadside environment using a *Fast ID* mobile device.

of *Fast ID* MOBILE DEVICES IN MISSOURI: 73

of *Fast ID* SEARCHES AS OF 2/28/2014: 4,154

of *Fast ID* IDENTIFICATIONS MADE AS OF 2/28/14: 2,548

of *Fast ID* FBI RISC HITS: 84

***Fast ID* BEGAN: OCTOBER 6, 2011**

***Fast ID* AGENCIES:**

MSHP
Boone County SD
Columbia PD
St. Louis County PD
Gladstone PD
Velda City PD
St. Louis Metropolitan PD
Joplin PD

Fast ID Q&A

HOW DOES *Fast ID* WORK? *Fast ID* is used to digitally scan the index fingers of an individual and submit the fingerprints for a two-finger comparison to the existing 2.8 million sets of fingerprints that are maintained in the state Automated Fingerprint Identification System (AFIS) at the Missouri State Highway Patrol (MSHP), which is the designated state Central Repository. The fingerprints are also forwarded on to the FBI for search against their Repository of Individuals of Special Concern (RISC), which contains approximately 2 - 3 million sets of fingerprints of sex offenders, known or suspected terrorists, immigration violators and federal fugitives.

WHAT INFORMATION IS RETURNED TO THE OFFICER AFTER A *Fast ID* SEARCH? The information returned on a *Fast ID* Search is limited. The state search returns the person's State Identification Number (SID), name, date of birth, sex and race. The FBI RISC search currently returns an FBI number along with which database was hit on, although with the implementation of the FBI's NCI Increment 4 in April of 2014, photos will be able to be returned with RISC hits.

WHAT IS *Fast ID* USED FOR? *Fast ID* technology is used to identify people with no identification on them such as motorists with no drivers license, deceased persons, crime or disaster victims, persons with medical conditions (amnesia victims), etc.

IS THERE A COST FOR *Fast ID*? No. MSHP does not currently charge law enforcement agencies a fee to utilize this service at this time. Agencies are responsible for procurement of their own devices, as well as their connection to the MSHP.

WHAT INFORMATION IS STORED AFTER A *Fast ID* SEARCH? Only a transaction number is retained for statistical purposes only. No fingerprints are stored and no demographic information is sent, as the searches are 100% fingerprint-based.

ARE *Fast ID* SEARCHES SECURE? Yes. All *Fast ID* searches are conducted utilizing the existing secure connection between Missouri law enforcement agencies and the MSHP network. All RISC searches route through the secure MSHP/FBI CJIS WAN.

WHAT ARE THE BENEFITS OF *Fast ID*?

- ✓ **Officer Safety** - Quick and Safe Method of Fingerprint-Based Identification
- ✓ **Public Safety** - Enables officers to quickly identify threats to Missouri citizens
- ✓ **Public Service** - Identifications that used to take hours now take seconds, resulting in better use of state resources and ultimately, tax dollars

For more information about *Fast ID*, contact Holly Haarmann, Program Manager, MSHP, CJIS Division at (573) 526-6264 or Holly.Haarmann@mshp.dps.mo.gov

MoDEx Update

The MoDEx Governing Board has voted to no longer support the search tool (IBM's Coplink) used to query MoDEx records. Moving forward, anyone wishing to access MoDEx should use the FBI's National Data Exchange (N-DEx). The process of ingesting MoDEx records to N-DEx is currently underway.

In addition to Missouri's 50-plus million records, N-DEx will provide free and immediate access to additional state and federal criminal justice records. From your Internet browser you will be able search local, state, tribal, and federal records; detect relationships between people, events, property and locations; share valuable case information in a secure real-time environment; use advanced analytical tools to graphically depict your investigations and identify "hot spots" of criminal activity; and receive notification when new records of interest enter the system or when another user searches similar interests.

To obtain access to N-DEx:

1. Obtain a LEO membership via the web at www.leo.gov.
2. Login to LEO.
3. Locate the N-DEx icon on the bottom right portion of the LEO home page in the "Spotlight" section and click the "Request N-DEx Access" link.
4. Click the State or Federal link corresponding to your agency.
5. Locate your sub-SIG (listed alphabetically) and click "Request Access."
6. Click the "I Meet the Criteria" link.
In the text field, list your:
 - Supervisor's name
 - Supervisor's phone number
 - Agency's ORI
7. Click "Submit" to forward your request to the sub-SIG moderator.
8. Locate the N-DEx icon on the bottom right portion of the LEO home page in the "Spotlight" section and click the "N-DEx Training Modules" link.
9. Complete the online training module "Policy and Operating CBT" and print the certificate of completion
10. Mail, fax, or email a copy of the certificate of completion to the sub-SIG moderator.

The moderator will review your N-DEx account request. When your request is approved, an email will be sent to your LEO email account.

At any time you would like a demonstration or on-site training, or for any questions, contact Matt Owens with the CJIS Division's Training Unit at 573-526-6153, Extension 2628, or via email at Matt.Owens@mshp.dps.mo.gov.

National Data Exchange

N-DEX Update

INTERPOL Data Now Available Through N-DEX

In an ongoing effort to enhance information sharing capabilities for the criminal justice community, N-DEX has partnered with the United States National Central Bureau (USNCB), the United States' designated representative to the International Criminal Police Organization (INTERPOL).

Interpol is an international organization whose mission is to facilitate the exchange of police information and promote cooperation and assistance between law enforcement authorities of its 190 member countries, including the United States.

N-DEX users can now access international data stored by INTERPOL by conducting structured/targeted searches on full names, dates of birth, vehicle information, and passport information.

N-DEX users can now view over 47 million INTERPOL records. These records include 154,787 nominal records (e.g., terrorists, wanted subjects, gang members, missing persons, sex offenders); 7,287,497 stolen vehicle records; and 38,936,639 stolen/lost travel documents such as visas, passports, and various types of identity cards.

As shown in the graphic, access to these records can be located in the External Data Sources section of the N-DEX filters. A structured/targeted search can include INTERPOL records through the clicking of the "USNCB INTERPOL Wash" check box. Results of these searches will be displayed as a separate result set from standard N-DEX results. A separate screen will appear requiring the user to agree to INTERPOL requirements and restrictions prior to accessing the records.

The screenshot displays the N-DEX web application interface. At the top, there is a navigation bar with links for Messages, Success Stories, Data Contributors, Policy Manual, User's Manual, Training CBTs, and Sign Out. Below this is a search bar with a "Search" button and a "Reset" button. The main content area is divided into several sections:

- Search Reason:** Includes fields for Search Purpose (required), Search Reason (required), and Search on Behalf of (optional).
- N-DEX Filters:** Includes sections for Geographic Location, Date, Data Sources, and Result Filters.
- External Data Sources:** This section is highlighted with a red box and contains the following options:
 - Leveraged Data Sources
 - DHS
 - USNCB INTERPOL Wash

National Data Exchange

N-DEX Update

Significant System Enhancements Coming in Early 2014

Increased Record Ingestion

Improvements are being made to the ingest capability of N-DEX with the goal of ingesting 10 million records per day.

Probabilistic Name Matching

During a search, N-DEX will locate names that have been transposed or are similar to the search request. This feature can be disabled to allow exact name matching.

Entity Extraction

When conducting either a targeted person or vehicle search, N-DEX will return results that were listed in the narrative fields as well as the people and vehicles listed in the structured fields.

Suggested Search Terms

When search results are returned for a simple search, N-DEX will provide suggested search terms that are semantically equivalent to the original search terms.

Non-Obvious Relationship Detection

N-DEX will provide the ability to filter a search result set for detected patterns. The similar information detected in the data set can reveal connections that weren't previously known.

Link Visualization Upgrade

The link visualization feature will be upgraded to include enhancements to the user interface as well as improvements in speed and browser compatibility.

Success Stories

Users will have the ability to access stories of how N-DEX is helping the criminal justice community enhance public safety and reduce crime.

Remember: As we move forward with the MoDEX to N-DEX migration, remember that Internet Explorer 7 through 9 and Mozilla Firefox 3 through 22 are N-DEX compatible. No other browsers are recommended at this time (i.e. Google Chrome).

N-DEX Continues Work with DOCs, ICOTS

N-DEX continues its commitment to increase N-DEX participation by the corrections, probation and parole communities. Data is currently being submitted by the Department of Correction (DOC) agencies in Indiana, Kansas, Mississippi and Nebraska. In the near future, DOCs from Iowa, Minnesota, Ohio, Oklahoma, Pennsylvania, Virginia, West Virginia and Wisconsin will submit their data using N-DEX.

In addition, N-DEX will soon include submissions from the Interstate Compact Offender Tracking System (ICOTS), a web-based system that facilitates the transfer of supervision from probationers and parolees from one state to another. Each year, the 50 states and 3 territories that comprise the Interstate Compact for Adult Offender Supervision (ICAOS) use ICOTS to process approximately 150,000 transfer requests and more than 1,000,000 compact activities for nearly 102,000 active supervision cases. These activities include notifications of departures, arrivals, progress, violations and case closures.

MULES

1 4 - 0 1

Missouri Uniform Law Enforcement System

File with MULES/NCIC Operations Manual

Welcome Aboard!!!

We would like to welcome the following agencies to MULES. These agencies are connecting to the CJIS network through the new Internet-based connection methods. The MSHP hopes agencies who have been unable to afford the dedicated connections will take advantage of the new low cost solutions.

**Blue Springs School District Department of Public Safety
Calverton Park Police Department
Vinita Park Police Department
Winona Police Department**

We also want to especially welcome the Calverton Park Police Department and Vinita Park Police Department. They formerly connected through REJIS and are now accessing MULES through the MSHP's CJIS network.

If your agency is interested in changing your connection to the CJIS network, please contact the Information Security Unit at 573-526-6153 ext. 2658.

Articles & Record Validations

Some agencies have noticed that since the move to MULES 4, some article entries have been showing up in their validation lists. This has caused questions since in the past articles weren't validated. It's true, NCIC does not require validation of *most* article entries. The exception is an article entered with the type code Z, Q, or T. Use of any of those codes, used to indicate articles used for public safety, critical infrastructure, and homeland security, will cause the article to require yearly validation. The most common error observed by CJIS involves operators mistakenly using the Z category code for a standard article entry. For example, a stolen personal laptop would be entered with the type code DLAPTOP, while a stolen police department laptop would be entered with the type code ZLAPTOP. The ZLAPTOP entry would not purge and would require yearly validation, the entry with DLAPTOP would not.

Any agency that has article records coming up for validation should make sure that the articles entered are actually used for official purposes. If they aren't, the entry should be modified to show the correct category code. Doing so will cause the entry to stop coming up for validation.

TAC Corner

NCIC Image File is Active!

MULES users now have the ability to utilize the NCIC Image File. This file allows the addition of images to NCIC Person, Vehicle, Part, and Article File entries. Inquiry agencies now have the ability to retrieve images that are associated with any entry in the NCIC database. Images can be classified as a mug shot, identifying image, or signature. NCIC Person File entries such as Wanted and Missing allow one mug shot and/or signature per NIC number and up to 10 identifying images. It is permissible to use a DOR image as a mug shot if no other image is available. Identifying images can be any image that helps identify the individual, such as additional facial images, images of scars, marks, or tattoos, clothing, etc. Images classified as mug shots when entered will automatically display when the inquiring agency selects the 'YES' option in the Image Indicator field of any QW transaction. Images classified as identifying images do not automatically display, but will be listed in the entry and must be inquired upon separately using the QII transaction. A QII transaction run with the NIC number will retrieve all images associated with the record.

NCIC Vehicle, Part, and Article File entries will accept one identifying image per NIC number. Mug shots and signature images cannot be entered in association with these entries. Any inquiry transaction that is run must have the Image Indicator field set to YES in order to retrieve images.

An NCIC Image File Orientation document has been placed on the CJIS Launch Pad in the MULES Help Documents folder. All operators should review this document as well as the Image File chapter of the NCIC Operating Manual.

Agencies are reminded that the NCIC Image File is active for NCIC database entries only. What this means is that any record housed in NCIC can have images attached, but MULES only records, such as misdemeanor warrants, cannot. When inquiring on records with attached images, those images will only display and be identified in the NCIC response, not in the MULES response. The MSHP is working toward a state image file that will extend this feature to MULES only records.

Any questions regarding the NCIC Image File can be directed to your MULES Trainer.

UCR

Uniform Crime Reporting

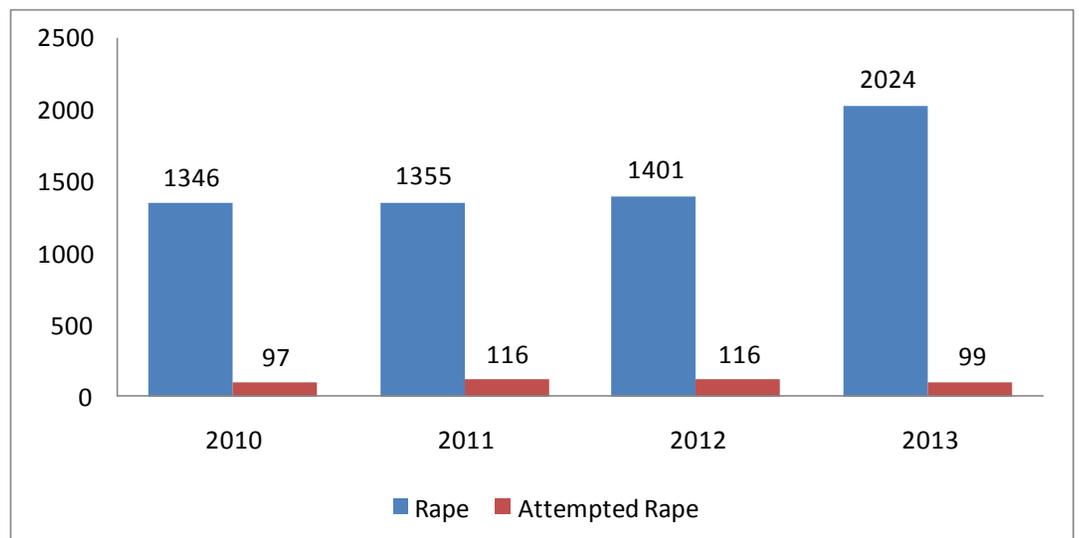

14-01

File with *Missouri Supplement to the UCR Handbook*

Expected Increase in Reported Rape Offenses for 2013

As we indicated in previous CJIS Newsletters and in a 2012 letter sent to each Missouri UCR reporting law enforcement agency, the U.S. Department of Justice implemented a new, expanded definition for the offense of rape in the FBI National UCR Program effective January 1, 2013. For the previous 90 years, a rape was defined by the FBI UCR Program as “carnal knowledge of a female forcibly and against her will.” This definition limited rapes to forced vaginal intercourse with a female victim by a male offender. The current UCR definition of rape includes “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” This now includes both female and male victims and offenders, forcible sodomy offenses, sexual assaults with an object, some incidents of child molestation, and rapes of individuals unable to consent due to age, mental ability, or chemical substances.

In turn, the MoUCR Program received **44.46%** more reported rapes in 2013 than in 2012. Your law enforcement agencies probably submitted a similar increase in UCR rape offenses. Please use this opportunity to educate your city council, county commission, domestic violence/sexual assault assistance groups, and local media that while actual rape incidents in your jurisdiction did not (likely) significantly increase, the method of defining rape in UCR changed dramatically.

Change in FBI UCR Audit Process for 2015

As the Missouri State Highway Patrol conducts an audit of every UCR reporting agency once every three years, the FBI conducts an audit of the Missouri State Highway Patrol every three years. In past audits, the FBI UCR Quality Assurance Review of the State of Missouri would consist of a visit to MSHP General Headquarters in Jefferson City, as well as visits to 9 –12 local law enforcement agencies to review their data and to gauge adherence with the National UCR Program standards. The FBI has recently announced that they will no longer be conducted on-site UCR audits, but will use a combination of phone and mail-in audits for the MSHP and for a number of randomly selected Missouri law enforcement agencies. More information on this new FBI audit process is scheduled to be presented by the FBI at the upcoming Association of State Uniform Crime Reporting Programs (ASUCRP) Conference in Kansas City, MO. Following that conference, we will be able to inform you on what to expect during the FBI audit of the State of Missouri in **April 2015**.

MIBRS Certification

The following Missouri law enforcement agencies are Missouri Incident Based Reporting System (MIBRS) Certified:

Kansas City Police Department
Lake Lotawana Police Department
Joplin Police Department
Gladstone Police Department
Grain Valley Police Department
Chillicothe Police Department
Duquesne Police Department

Ste Genevieve County Sheriff's Office
St. Peters Police Department
Laclede County Sheriff's Office
Smithville Police Department
St. Charles Police Department
Oak Grove Police Department
Carthage Police Department (**NEW!**)

The Missouri UCR Program began MIBRS certification of agencies on February 1, 2006. There are several points to remember regarding MIBRS certification:

- The transition to incident-based reporting is voluntary, not mandatory.
- Any agency choosing to convert from summary UCR reporting to incident-based reporting must first be certified to ensure the quality of their crime data.
- During the certification process, agencies will be required to submit summary UCR reports.
- Once certified by the state program, summary UCR reporting will no longer be required as the incident-based data received from that agency will be converted to summary by the state.
- Repository specifications for the submission files are available upon request or can be accessed via the UCR website "Downloads" link.

More information on agency MIBRS certification is available upon request by contacting the CJIS Division, at (573) 526-6278.

UCR Statistical Websites

There are two official websites that provide Missouri Uniform Crime Reporting (UCR) data for public and private use. Both websites can be used to gather UCR statistics reported by law enforcement agencies. These websites are accessible to governmental agencies, those in academia, and the general public.

The first is the Missouri State Highway Patrol's (MSHP) Uniform Crime Reporting Statistical Analysis Website. This site can generate UCR statistical reports by jurisdiction and timeframe based on the monthly data submitted by over 650 Missouri law enforcement agencies. For those law enforcement personnel that have a UCR web registration, access to the private UCR Statistical Analysis Website is granted. The data maintained in this website is update regularly, even data from previous years if a change in an agency's data is submitted. This allows an agency to drill down through different type of reports to see exactly what their law enforcement agency or other law enforcement agencies have submitted within a state, county, city, or campus jurisdiction. When this type of query is available, the user will see a button to select public or private. By selecting "private," the user will have access to this more granular information. Only data for law enforcement agencies in Missouri can be queried. The query website can be reached at:

http://www.mshp.dps.missouri.gov/MSHPWeb/SAC/data_and_statistics_ucr.html

The data can also be accessed from the MSHP home page or the Missouri Department of Public Safety home page. On both of these websites, the link is located in the third column from the left at the bottom of the page. All users with a UCR web registration will use the "UCR - Law Enforcement" link. All others will use the "UCR — Public" link.

The second website that UCR data can be obtained is the Federal Bureau of Investigation's (FBI) Uniform Crime Statistics Website, also called the UCR Data Tool. This website allows the user to view all UCR data submitted by all law enforcement agencies across the nation, including UCR data from Missouri. Please note that the UCR Data Tool only includes annual offense data from agencies that submit a complete year's worth of data. Additionally, these annual totals are based upon firm deadlines provided by the FBI. For example, the 2012 data only includes data submitted to the FBI prior to April 2013. Any submissions, corrections, or modifications submitted to the MSHP past the FBI deadline will not appear at the federal level. The data is archived after the FBI deadline and it cannot be changed in publications or on the website. This website can be reached from the FBI's home page or at the following address:

<http://www.ucrdatatool.gov/>

Cautionary note: Do not use these statistics to compare an agency, city, county, region, or a state against another. Even though an agency, city, county, region, or a state may be comparable in size, there are other factors that must be considered such as demographics, location, types of industry, etc. when viewing or using these statistics.

MISSION STATEMENT

The Association of State Uniform Crime Reporting Programs, Incorporated, (ASUCRP) represents participants of the National Uniform Crime Reporting Program (UCR) and the National Incident Based Reporting System (NIBRS) on the state, regional, and national levels, and provides a method of exchanging technical data on UCR/NIBRS methodology and efforts in a regional, state, or local setting.

Conference Topics

- UCR Audits
- UCR Training
- UCR Redevelopment
- Campus Crime
- Human Trafficking
- Identity Theft
- Hate Crime
- NIBRS via N-DEx
- BJS NCS-X Project
- Marijuana Laws
- and many more ...

Bismarck, ND 58503

Alignment Issue on MoUCR Website FIXED!

The Age/Sex/Race/Ethnicity arrest forms on the MoUCR Website have had cumbersome alignment issues ever since the new mandatory FBI SRS offense codes and ethnicity fields were added on February 1, 2013. While some screen resolutions and browser recommendations were disseminated, these suggestions did not correct the issues.

The MSHP is happy to announce that the MoUCR Website was updated on March 31, 2014 to include a patch to fix to the alignment issues. This patch should correct all future, as well as previously submitted, UCR arrest forms. Please note that we are also working toward building a brand new MoUCR Data Entry Website for 2015!

If you are still having any technical issues with your UCR arrest data entry, please contact the MoUCR Program Office at 573-526-6153.
